### **DETAILED ACTION**

## **Priority**

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### Information Disclosure Statement

The information disclosure statement filed 12/22/2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

#### Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant's disclosure does not explain how the health protection device is

Art Unit: 3643

attached to the cow's udder. Applicant states on p. 5 that the brassiere is placed on the udder, but does not explain how it is done.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5 and 6 recite the limitation "the center" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claims 7-10 recite the limitation "the outer wall" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 2 are rejected as best understood under 35 U.S.C. 103(a) as being unpatentable over patent no. 2,953,671 to Allen et al. in view patent no. 928,080 to Tatman.

Application/Control Number: 10/561,722

Art Unit: 3643

Allen et al. discloses a brassiere (16 and 18), an inner hood (surface of element 16 closest to cow's udder), an outer hood (32), and a heater (36).

Allen et al. does not disclose the circular openings and teat cup.

Tatman teaches it is known to have circular openings (were visible at the exact location of the teat pockets (6) prior to their attachment) and teat cup (6) in a calf weaner.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Allen et al. to include the openings and teat cup as taught by Tatman for the purpose of providing support for the cow's udder as stated by Tatman in lines 8-11.

Claim rejected as best understood under 35 U.S.C. 103(a) as being unpatentable over Allen et al. in view of Tatman as applied to claim 1 or 2 above, and further in view of patent no. 5,426,925 to Smargiassi.

Allen et al. in view of Tatman disclose as discussed above.

Allen et al. in view of Tatman does not disclose permanent magnets arranged around the outer wall of the inner hood and circular openings.

Smargiassi teaches it is known to have magnets (9) in a biomagnet covering for animals.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Allen et al. in view of Tatman to include the magnets as taught by Smargiassi for the purpose of treating the overall well being of the animal as stated by Smargiassi in col. 2, lines 45-52.

Art Unit: 3643

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the magnets arranged around the outer wall of the inner hood and circular openings, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

# Allowable Subject Matter

Claims 3-6 and 8-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Willie W. Berry, Jr. whose telephone number is (571) 272-8974. The examiner can normally be reached on 9:00am to 5:30pm Mon. - Fri..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Poon can be reached on (571) 272-6891. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
